Established in 1976, Manufactured Assemblies Corporation is headquartered in Dayton, Ohio. MAC was solidly built on our initial core strength-manufacturing cable assemblies and wire harnesses. Over the past couple decades, our capabilities have developed as our business and our customers' needs have grown; over the past ten years, Manufactured Assemblies Corporation has established a reputation as an industry leader in contract manufacturing. We continue to expand and adapt with current technologies, providing out source solutions to large and small OEMs, as well as superior service and products and forward-thinking solutions to support every customer need. Thirty years of success gives our customers the edge they need to succeed. Our customers are your best source for an understanding of our unique capabilities. MAC's capabilities allow a diversified range of products produced in two U.S. manufacturing facilities and our overseas alliance partners.
